PROFESSIONAL SUMMARY

Data Engineer with about one year of hands-on experience building and maintaining production ETL/ELT pipelines in Python and SQL on Google Cloud Platform (BigQuery, Cloud Storage), processing 45+ TB of data and millions of records. Experienced in ingesting data from multiple sources (SFTP feeds, third-party files), data validation and quality checks, pipeline troubleshooting, and optimization. Comfortable with data warehouse and cloud storage concepts, and keen to apply this foundation to Databricks, Apache Spark, and Delta Lake lakehouse development.

TECHNICAL SKILLS

Programming & Querying: Python (Pandas, NumPy), SQL
Data Engineering: ETL/ELT Pipeline Development, Multi-Source Data Ingestion, Data Transformation, Batch Processing, Workflow Automation
Cloud: Google Cloud Platform (GCP), BigQuery, Cloud Storage, Vertex AI
Data Quality & Operations: Data Validation, Data Quality Monitoring, Pipeline Troubleshooting & Optimization
ML Data Pipelines: Feature engineering and model-ready data preparation for 8+ ML models
Reporting: Looker Studio, Power BI

EXPERIENCE

Data Engineer *Oct 2025 – Present*
Muthoot Finance Ltd *Bengaluru, India*

- Designed and maintained scalable Python/SQL ETL pipelines for ingestion, transformation, and processing of enterprise datasets, improving pipeline efficiency and reducing processing time by 30%.
- Built and automated data workflows integrating SFTP feeds, third-party data files, BigQuery, and Cloud Storage, enabling reliable processing of 45+ TB of data and millions of records with high accuracy.
- Implemented data validation and quality checks within production pipelines, improving data reliability and reducing downstream processing issues by 25%.
- Troubleshot pipeline failures and data issues in production, contributing to improvements in pipeline performance and reliability.
- Developed data preprocessing and reusable feature-engineering pipelines supporting 8+ machine learning models, reducing repetitive development effort by 35%.
- Took ownership of the project's bounce-rate metric, driving it down from 18.2% to 16.8% through pipeline improvements, data quality enhancements, and process optimization.

Internship *Feb 2025 – Sep 2025*
Hari Krishna Solutions *Surat, India*

- Analyzed and processed multiple datasets using SQL and Python to support business reporting and decision-making, including data cleaning, validation, and transformation.
- Wrote SQL queries to extract, aggregate, and analyze data across multiple tables, enabling stakeholders to track key business metrics and operational trends.
- Automated routine data preparation and processing tasks using Python, reducing manual effort and improving reporting efficiency.

EDUCATION

Bachelor of Technology (B.Tech), Computer Science Engineering *Nov 2022 – Jun 2025*
Specialization: Artificial Intelligence & Machine Learning

Rungta College of Engineering and Technology, Bhilai

CERTIFICATIONS

- Prompt Engineering Master – GenAI Tools
- SQL Certification
- Amazon Power BI Bootcamp
